

Why are US cemeteries filling with veterans dying by suicide? Protesting lack of care that they are not getting from VA or USA! How simple can that be to figure out? Even an uneducated village idiot knows that!!

Every vet suicide on VA property tells the same story: VA staff mistreatment is root cause of every veteran death by suicide. While VA may not be responsible for every death, it owns every one of them on its premises and for lack of veteran care in all the others.

I saw a VA psychologist for over a year that offered exposure therapy to ease my symptoms, but ultimately made them far worse, to the point I became suicidal. I felt confident enough to tell him that it wasn't working and he responded with, "You know I am doing you a favor by seeing you." ...getting in touch with your doctor through the VA is like killing yourself—so it's a lose-lose situation. Kat Kaelin The Havok Journal February 28, 2019.

"VA sucks a bag of sweaty camel dicks." Sophia-Helene Mees de Tricht, US Veteran, Afghanistan – 'Women's VA.'

First They Came

First they came for the Native Americans

Then they came for the Jews

Next they came for the soldiers and veterans

When they came for you and me

None were left to fight for you....or me.

If you will not stand with us

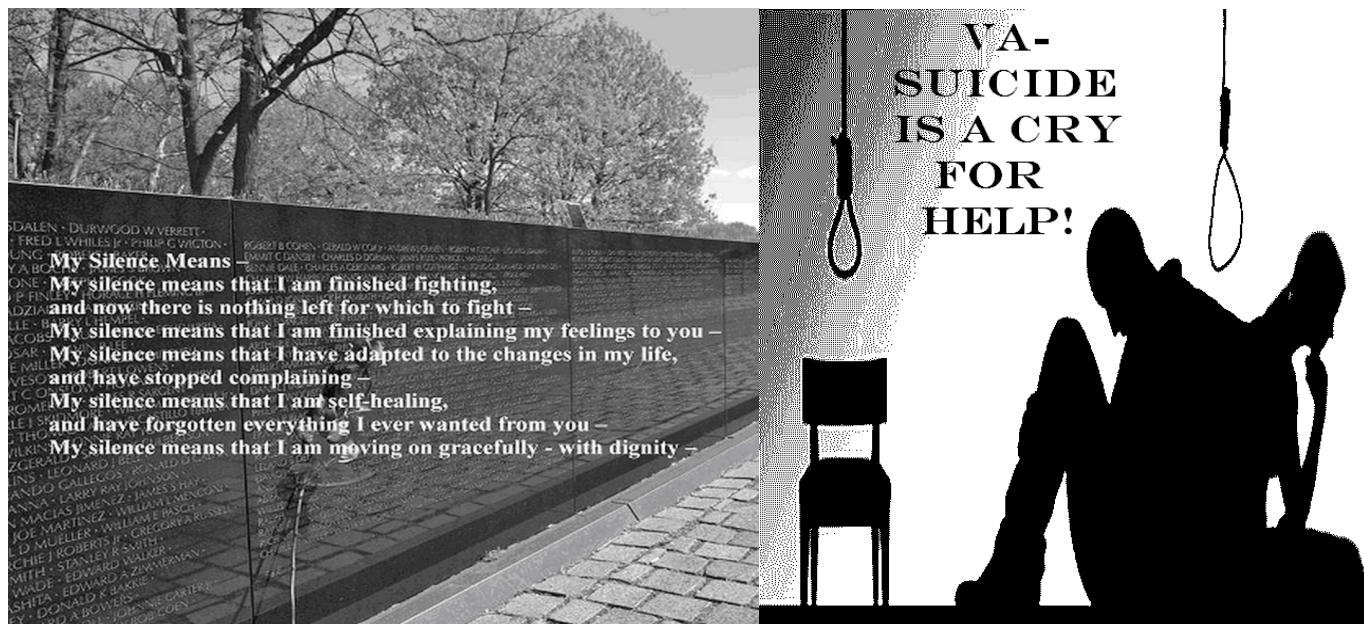

When your time comes who will stand up and fight for you?

Famous last words that it could never happen here; history repeats never in the same way but nonetheless repeats...the same. The useful idiots are always disposed of last. Yuri Bezmenov KGB message to USA detailing Communist overthrow from within.

While waiting in VA Dallas regional, I overheard two frustrated VA medical employees in discussion. One said to the other, "VA is another chance for Veterans to suffer and die for their country..." The other employee snorted agreement.

Plane crashes cannot be fixed; one cleans and sends the mess to salvage then builds a new plane. VA is a plane crash in toto! Any questions? RA – USAF, Vietnam and Cold Wars – SAC Mobile Alert, Nuclear First Strike Forces.

VA is a taxpayer funded, US corporate culture driven by greed and mammon. RA – USAF, Vietnam and Cold Wars – SAC Mobile Alert, Nuclear First Strike Forces.

*There is no greater national disgrace than when a man or woman is so distraught that s/he dies by suicide as protest, sending **THE** message that screams “FAILURE” to his or her country written in veteran blood. Over seven times the 69,000 US troops that were killed in Vietnam War have since died by suicide from not getting needed care from America. Currently, more Veterans die by suicide every year than the total number of combat deaths in Iraq and Afghanistan combined. Where is their remembrance? We do not need more token emotional moments or memorials; US Veterans and active Military people, we walk among the living you know – and need true **HELP!** America, land of broken promises and fallen heroes, reserve, your cold, non-living headstones for the Dead.*

After discharge, VA and transition benefits were a complete fraud. I was salvageable then. When applying for C&P and service related help, VA betrayed me, lied and denied them in toto, and then sinking to a new low even for VA blamed my mother for service related problems! Moreover, the misogynist adjudication officer was arrogant enough to put that in writing, and I still have the rejection letter proving it. I never forgave the company for either sin especially about blaming my mother and now for murdering my dad in 2008.

VA payments in FREE party slogans such as ‘thanks for your service’ discounts that we served with a gun barrel in our backs held by violence of US conscription law. Our choices of serve, exile, or imprisonment were the evils presented from ‘we the American people and its government’ when drafting us into the Vietnam conflict and war. Then they officially betrayed all of us – in toto – January 21, 1977.

Stigma of the Vietnam War still curses Veterans of that era, and will do so until we all die. Then it befalls to the rightful owners – The American nation and its government that waged it.

‘A lie is a lie even when everyone believes it; truth remains truth even when nobody believes it. Adolf Hitler.

Veterans Affairs Department, aka VA is a FAILED dark horse, white elephant benefits and healthcare system well past overdue for sunset and retirement from Federal system. Over 90 percent of US Veterans do not receive care from the institution. Instead, Veterans receive their care and benefits from private healthcare funded by state Medicaid, Federal Medicare, Obamacare, state county funded healthcare systems, and private health insurance, ad infinitum. VA’s skewed data is that over 70 percent of US vets do not use VA at all. The agency is now well

known as the worst healthcare system in USA; a reputation that the scandal-plagued institution bears that out very nicely. From Phoenix scandal during Obama's era to ongoing Clarksburg West Va. Hospital veteran mass murders by hospital staff to the continuing national veteran suicide epidemic protesting the criminally negligent Veterans Affairs department hell-care to those trapped in it. VA is responsible for on campus veteran suicides occurring in either VA clinical or campus parking lots or elsewhere shortly after release from MHC facilities, in which medical staff drugged and psychologically terrorized them into suicidal psychosis just before death. The big propagandized lie is VA provides healthcare on par or better than private HCS. Really, if so why are over 90 percent of vets using private HCS? Why are those using it getting their actual care outside and visiting VA only once a year to keep disability benefits current? Why in nationwide polls, not skewed by VA and VSO interests, do over 88 percent of vets who answered them want true, free choice nationwide outside of VA administration entirely? True choice - not sabotaged pseudo-voucher VetChoice and Mission Act programs set up to fail and burden them paying out of pocket all expenses to doctors and medical facilities for their 'outside' care when VA does not. VA is a plane crash in toto; **everyone knows plane crashes cannot be fixed; they are clean up, sent to salvage and replaced with a new plane.**

The big lie. Adolf Hitler is quoted, “ [When telling a lie, tell the biggest lie possible, mixed with a grain of truth so that masses will believe it...]” He should know for all the ‘porkys’ he and his Nazi’s got away with telling during WW2. Those folks wrote the book “Effective Mass Lying 101.” The pervasive lie that **veterans get healthcare and benefits on par or better than private sector** is now a commonly believed, persistent, propagandized lie. Here are the historical facts – you figure out the rest. During the Clinton Administration, first lady, Hillary Clinton’s plan was to sell America on Socialized Healthcare. She needed a sterling Socialized example so chose the **purely socialized** VA system as her model. Armed with a presidential decree she gave VA an ultimatum: *reform into that sterling model or else*. Hillary needs no introduction: she has sharp teeth and a very nasty bite. In 1994, Clinton put Kenneth Kizer in charge of the VA health system, as Undersecretary of Veterans Affairs. The new sheriff over that agency had large teeth and nasty bite, too. Kizer among his many accomplishments, reformed VA; he modernized the VA’s computer systems, fired poor-performing doctors, support staff, and established private-sector-style metrics to measure the VA’s performance on things like patient wait times, care quality, service, etc. In other words, during his five-year tenure, Kizer reformed VA into a top-performing healthcare and benefits institution notwithstanding entrenched, status quo ‘good old boy and girl’ interests dead set against him derailing their gravy trains. He created a long overdue mammoth train wreck from them to provide quality Veteran healthcare providing them *the benefits they deserved* for the first time in VA history. However, all good things end; after Clinton left office and Kizer resigned from VA so did their success story. Recidivism quickly reclaimed the institution to its former train wreck disaster run by status quo ‘good old boy and girl’ special interests: VSO’s, political pork, VA crony’s, internal corruption, etc while still getting a free ride and lunch on their taxpayer supported gravy trains. All the while, hiding behind claimed and published accounts since the Clinton era VA golden age. VA is now considered the worst healthcare system in America yet perpetuates commonly believed lies to the contrary. Ref: Avik Roy, Forbes Staff writer.

I now understand first hand and up close why US Veterans undergoing VA MHC treatments are killing selves on and off VA campuses. VA ‘therapists’ are drugging and terrorizing disturbed vets into suicidal psychosis! Here is my recent experience in a VA North Texas Healthcare clinic that I can only sum up as a first degree ‘Mind-Fuck.’ Yes, ‘Mind-Fuck’ is a vulgar term but it so eloquently describes the experience in toto! However, if offended, substitute PC ‘Mind Rape’ softer language in its place.

My recent visit to a local North Texas Healthcare VA clinic taught me why the Vet in 2019 walked out of a VA MHC ward and **immediately** suicided on the campus parking lot! Then another parking lot suicide that shut down VA Dallas Regional MHC ward. Days later, another Vet did so in another Texas VA clinic waiting room after his appointment, about which, in all three instances, VA refuses to release details. Here is why. **VA ‘therapists’ are purposely drugging and provoking vets into suicide.** Two PACT nurses baited me about a device VA offered that might help control severe hypertension that is medically untreatable, by VA anyway, which I suffer from severe anxiety, depression, PTSD and more since in service diagnosis and treatment in 1975, which VA vehemently denied over 40 years ago after discharge for C&P benefits but insisted upon mistreating in its ‘MH-careless’ outpatient clinic and hospital. **Then sinking to a new low even for VA, an arrogant, misogynist Waco TX adjudication officer blamed my mother for service related problems in a**

written denial. I still have the rejection letter proving it! I never forgave that corporation for either sin especially about blaming my mother. Four decades later during Obama's administration, when that mess returned for VA to clean up, according to VA clinic and civilian hospital receiving ER and ICU doctors, I missed dying from those denied issues by only a day or two, and adding me to the more than 300,000 Vets who died while on waiting lists for care, because they could not pay with private health insurance, like all those people who were insured scheduled ahead of them. Anyway, in order to get the thing, I had to go through MHC to do so. Now I have resisted all attempts at going back into that horror-house asylum because I waste precious energy telling the same story to different people who cannot handle it – "**they're just shitty...**" People who do more harm than anything else; doing nothing at best. **Read on for an example of at worst and why protesting Vets are literally killing selves on VA campuses!** VA's denial to accept and fear of suicide, dying, and death amazes me. Soldiers do not have such airy-fairy luxuries, as do civilians living a Santa Clause syndrome. Moreover, the people working in VA clinics and regional hospitals are horrified at catching something from us dirty old vets. Odd place to work with such fears; for, those toxic hospitals, and clinics are nothing but wounded, disturbed, crippled, sick, dying and death. Nevertheless, the human is an odd creature when it comes to such things. I agreed **only** to interview about a device. However, once there for the appointment everything changed. Where have I seen this before? After signing the bottom line in a military enlistment contract: until I signed no victim, no crime – afterwards, me when everything changed **exclusive to my benefit.** At the appointment, first change was a doctor switch; to an inexperienced, fresh out of school, untrained PhD psychologist very full of herself: psychologists are not real doctors just ask their mothers. Mother's say, 'My daughter the **psychiatrist!** not psychologist.' She was clueless about the device and reason why I was there. 'I came here to discuss the device only,' said I. She got up and left the room – **someone was coaching her from behind the scene;** upon returning unable to do so she asked, 'what should I do now?' [As the doctor, she should know! This is her party. The indecisive woman asked me that more than once. I think, **VA should return Ms. PhD from whence she came – her village is missing an idiot.**] 'Send me home,' I replied. Nope, she ignored my philistine suggestion and began asking other questions about my chronic anxiety in a bait and switch deception claiming them necessary to obtain the device. I think this was her feeble stab at **forced** therapy with a hidden agenda! Another instance of VA, in cookie cutter one size fits all, giving Vets what **it** thinks they need NOT what we individually need as living human beings. Immediately, in that toxic environment I felt provoked and intimidated. She had to call someone and ask how to make a referral to the person who actually issues these devices! Then printed off and gave me hard copy of device manufacturer's sales literature. The very expensive device is an unproven prototype that VA sent back to manufacturer for more testing and proof that it works. However, I have private health insurance that it would bill for reimbursement costs...hmmm, very fishy. I felt so alarmed and threatened that every time this loose cannon left the room; automatically, I immediately exited behind her to a hallway in proximity to the main lobby exit door. That is an auto-defense, escape measure for me: always have exits from threatening situations, which engages automatically when under duress. **I was under extreme threat! That response also is symptom of severe anxiety or PTSD.** It is still unclear why I did not straight away leave that hostile situation. Consequently, a revelation that came out at the end of this useless, disastrous 'therapy' session is that I underwent 'Mental Health 'Care-less'' hell for what the PCP should have done?! Moreover, she said it was only a 30-minute interview but kept adding overtime extensions until meeting her agenda over an hour later. Essentially she asked the same questions and I gave her the same answers as before to other VA providers in another round of tell me the story, again, in a game of **'how many different ways do you want me to tell you the same story?'** **I am not proud of my military service and do not tell 'War Stories' or wish to remember it; when asked about those years I either change the subject, walk away or simply say I did my time and got out.** What these people do not understand, is each time I retell my story to the same or different person who cannot comprehend, I relive the trauma. Then spend weeks getting over it in a brown airy depression or worse a black one. **I am extremely anxious, have an impending sense of doom and pathos, have more night terrors, cannot sleep, suicidal ideations, and am more susceptible to suicide attempt until this passes! The therapist sleeps fine, but I do not! If any of you fools underwent what military forced we vets to experience, witness, do, know, if you knew what we/I do, none would sleep or want to get out of bed either!!** After a very vague disclaimer that *she* 'might' be recorded for quality purposes and other CYA verbiage to use against me, I assume was for patient consent to being video or audio recorded without my knowledge, which was not **my** consent, she launched into a verbal questionnaire. I requested a paper copy. She provided only a part of what she claimed was it before verbally resuming her agenda. When I could not or would not answer her questions, she harassed and badgered me for them, – especially for questions, I did not have a hard copy of – hmmm wonder what she is hiding. **I have no idea what she actually fed as my answers into the VA system: my answers or her lies?** My fight or flight and danger alert meters were on full defenses and more. Anxiety levels were, too! Blood pressures were off scale. **I was under attack.** 'You seem tense,' she remarked. 'That is anxiety,' said I, 'and hopelessness is typical to depression.' 'I know that,' she snapped! Sure did not seem to me that she recognized them in real life practical application. She talked so fast I could not track the conversation especially when muffled through a Covid mask. That was irksome alone. I requested she slow down rate of speech at least twice but

instead she sped up rapid-fire questioning, interrogation. Moreover, the fearful doctor was overly needle-some about how I wore my Covid mask. In one instance, I refused to answer a skewed question because half was yes and half was no. 'I cannot answer that,' said I. She then re-framed it many ways and hassled me into finally saying, 'NO!' Meaning I will not answer it. [The information is in VA records and if not then someone is not doing, her job or the 'therapist' was too lazy to look.] She cut to the chase about suicide ideation and attempts. How many attempts? I don't know. [They are not keepsakes like birthdays or anniversaries. Each attempt is an impulsive decision when the thread holding me together snaps! Not a planned event like Bar Mitzvah!] So she asked, 'when was the last attempt?' My reply, 'Last year around August...' [It was the same report previously given along with the VA suicide chat line 'hold please.' If that person did her job, it is already in their records.] 'Any other attempts?' she queried? 'You tell me,' doctor. Recently during the US race riots, a drive by mugger attempted to rob me while walking alone on a city street. He pulled up and screamed, "give me your money or I will shoot you!" He did this twice because I did not fearfully respond to him as expected. I am fed up with punks and will bite a bullet before taking anymore bullying from anyone. I just stood still looking at this fool on his first try. He pulled up about 25 feet and did it again. On the second attempt I stormed up to the open car window, leaned in and screamed at him verbatim, "SHOOT ME, ASSHOLE! RIGHT BETWEEN THE EYES, DO NOT MISS, ASSHOLE! WHAT IS THE PROBLEM, ASSHOLE? SHOOT ME! DO IT, ASSHOLE!!" Now I was prepared to self-defend ***but gave him a clear and open advantage to take me out first in suicide by mugger.*** He was 40 plus years my junior, faster with the first, clear, open shot with his hand on something under a cover on the center console between passenger and driver seats. My weapon buried deeply in a pocket with a long way to go in getting to it, and my hand and finger were pointing between my eyes. As an old man, I carry a weapon when walking alone in this neighborhood. The druggies like to target vulnerable, old people. I may be crazy but not that crazy and intend to take a piece of them with me if challenged. Like an old Wild West standoff, with both opponents armed with same intent, but the one who draws first, fires and kills the competitor wins. ***I gave him the advantage to kill me first in a death by mugger shooting; like death by cop when one holds an empty gun or toy that looks real while provoking a cop into defensively shooting and killing me first.*** Perhaps that is behind the claimed police shootings of 'unarmed' people in 'unprovoked' incidents used to achieve another agenda while masking it as 'racial, police intolerance?' Anyway, a cop does not deserve the guilt of living with murder but a punk, fool-mugger does!" ***Suicide is a death wish. For veterans like me, without the proper care we need suicide is not an if but when one is finally successful.*** The means justifies the ends, period. Lady Death again was there at the drive by mugging but refused to take me. ***However, the fine PhD doctor's misperception of that second suicide attempt was to reframe it as 'self-defense.'*** ***A clear case of her willful blind-denial in not consciously recognizing a suicidal patient!! Another example of what VA does not wish to see - does not exist. That is denial! I asked her what sane person would provoke and dare a mugger to shoot him as self-defense?! She cluelessly just stared at me like I was growing tulips out of my head. I have seen that same stupid expression on faces of VA personnel far too many times to mention.*** Yes, I was only prepared for self-defense but not sincerely. My unexpected response scared and confused the fool-mugger so badly, instead of shooting me; the young man sped off and at street intersection, first he drove straight, then backed up, turned left, then backed up and sped across three lanes of traffic to the right before disappearing. I bet that young cathead does not pull such a stunt again. ***I did not wish to hurt him; but hoped to teach him a lesson or that he would take me out in a TKO exit from this hell; a fool-mugger deserves to live with murder.*** Now I understand why Vets are killing selves while under VA MH - 'HELLCARE.' ***VA personnel are mentally torturing disturbed, drugged patients into suicide! That is psychological terror and warfare!! A US government agency, VA, is doing that to our US Veterans!*** I expect the aforementioned men who suicided on VA campus after release from a VA MHC ward were on psychotic meds, which pushed him into hysteric, high-anxiety desperation to end it all, and he did so at first opportunity, in the VA parking lot while others did so days later in a VA clinic waiting room or parking lot! VA has come under severe fire in its haphazard to criminally negligent prescription drug prescribing practices. It is no secret at all, for instance the recent opioid scandal and Clarksburg W. Va., VA hospital murders by a VA nurse from drug overdoses that killed unsuspecting vets. I know of those VA prescribed SSRI and other psychotic meds very well!! ***They are high anxiety, creepy experiences like brain worms in the head!*** And recently I underwent a crazy making session with someone who in all probability was just like the VA staff that mind-raped those Vets in the MHC ward and clinics that suicided on VA campuses, hospitals and clinics. These fools do not understand that suicide is an impulsive act and what ever tool that is expedient to do so, gets used! ***The method is moot! One uses whatever tool is handy to end their pain! The aforewritten is epitome as reasons not to contact VA for help! It punishes one for doing so using untrained, incompetent staff that harms via crazy-making, mental terrorism and dangerous drugs.*** Furthermore, mind-raping someone already troubled, on psychotic meds drives the person so insane as not to know what s/he is doing or why. The person only wishes to end the hurting! Acts that push a troubled person from ideation into self-destructive attempts that all too often are successful. Moreover, several glaring symptoms of PTSD that Dr. PhD did not readily recognize in me:

- Almost 50 years of untreatable Depression

- Flashback trauma
- Sleeping problems, night-terrors and insomnia*
- Paranoia, High Anxiety
- Self-destructive behavior; no will to live, suicidal, hopelessness, pathos, death wish.
- Anger, severe irritability, impatience, which are clear symptoms of serious depression.

*I have not had a decent nights sleep in over 45 years, which is the cost to soldiers in keeping Americans safely sleeping cozily in their beds each night.

Consequently is it any surprise why untreated Vets undergoing effects of “SHELL SHOCK!” or the PC soft language of PTSD, resort to suicide ending their insanity. With loose cannons like Ms. PhD. mistreating us, VA is intentionally killing more of Vets with its suicide treatments and preventives than it is helping. For VA, Vet suicide pays the firm very well.

That clinic visit sent me to bed for weeks in a brown-airy-depression trying to stay out of a black-depression. Those are much different from ‘brown airies.’ In ‘dark-black’ depressions, Hellhounds come to fetch me into that place. Essentially, VA lied, betrayed, denied, defrauded, and coerced me into a hostile MHC visit and forced therapy to prove it was right? All because I vociferously protested that their whole MH-careless program is a duck pond of Quacks and snake oil, tent revival faith healer shows. In that toxic environment, I was under extreme duress, which was more like a ‘holy inquisition’ or a Communist Chinese or Russian ‘Organ’ gulag interrogation than Q&A therapy session. **Another, I cannot believe that these people are doing this to me! The same disbelief my Jewish ancestors exclaimed under Dr. Mengele’s human animal experiments on them in NAZI death camps. VA performs those same experiments on Veteran human lab monkeys, pushing them from suicidal ideation over the edge into an impulsive-self-inflicted death: I have had it ‘BANG!’ My problem is forever resolved.** Then VA gets all the credit and cannot figure out why? Who cares when it pays well!! **Adding insult to injury, VA billed my health insurance \$111.95 for this creative suffering?!** And adding salt to that benefits maintains I have no problems at all. When the divided and hypocritical VA gets it together I might again speak to them; otherwise talk to the moon. **When inaction, hand wringing and talking ends suicide answers the question permanently.** Aforewritten recent experience is what happens in VA clinic backroom treatment and MHC wards that nobody but they know about. VA employee disrespect of Veterans especially behind closed doors is rampant. **They treat us like dogshit under a doormat.** Most of us take it for a while until the many disrespectful moments add up into an explosive outburst for which VA blames and punishes the Vet. No one looks at what VA staff and bureaucracy purposely does provoking and intimidating a sick, drugged, troubled patient into riot, outrage and suicide. Furthermore, if I TKO and VA faces another media hit or worse, Ms. PhD is their scapegoat out of scandal. After all, dead Vets tell no tales!! VA thinks of everything – almost – except wrongful death lawsuits against VA, over 1 billion dollars and growing. The dead vet finally has a say from the grave against the agency’s injustices.

Moreover, as passive aggressive protests against the lousy treatment we receive from the institution, VA has a very large problem with Vet appointment **no shows**. On the surface, it appears Vets are at fault for this behavior; however, no one asks what VA staff is doing to cause and encourage our behavior. In some cases VA schedulers purposely schedule appointments unknown to the vet creating ‘no shows’ to CYA ‘cover their assets’ making the patient appear at fault, which is variant to scheduling fraud underlying those of Obama’s Phoenix Az scandal. I asked a nurse why so many no shows and she said, ‘ they [vets] get meds refilled then do not show up [wasting their time] for follow up appointments’ then left it at that. Now I recognize why after undergoing the passive to outright direct hostile intolerance by some clinic staff employees and above-mentioned doctor, and those like her. VA, same as all HMO systems, receives ‘Capitation payments’ from GAO for each active Vet on their rolls. More numbers is more money. Money for nothing when we are not in the clinic; losses when we are, with exception for those paying with private insurance; those patients are lured in for billing purposes all possible adding more profit to capitation payment. Another point is to drive away high liability, hard to treat or ‘IP,’ ‘identified problem,’ patients. In other words, institution staff ‘cherry picks and lemon drops’ or ‘patient dumps’ high responsibility or troublesome Vets to escape liability and onus same as private sector does. Especially high-risk and/or suicidal mental health cases. I have faced more stigmas out of US and VA healthcare industry for MH issues, institutions that claim to help us, than anywhere else. On my first visit, that was the first thing the VA MHC Dr. did. She prescribed meds, that only made me sicker, and brochures to civilian ‘free’ MHC clinics saying ‘go there,’ then sent me home. In other words ‘PATIENT DUMPING’ liability while keeping MHC budget in house that remained unspent and was misappropriated to other non-Veteran expenses feeding agency bureaucracy – VA bonuses, raises, perks and other employee benefits. See GAO, OIG and media scandals about those issues. However, being a taxpayer-supported institution, culling patients does not yet carry fiscal and legal consequences that private sector medicine faces when

judiciously employing ‘cherry picking, lemon dropping’ patient dumping practices. I have undergone this experience at VA three times, so far. A medical staffer, usually a nurse, in private office setting provokes, needles and acts hostile toward a patient trying to force a knee-jerk reaction out of him or her. When it happens, s/he then calls for backup security to remove the person, blames and flags the Vet as a ‘problem patient.’ In many cases, it angers a patient into not returning to the clinic while also passively protesting by not showing up for appointments. **In the worst of cases, a Veteran kills self in clinic waiting room or parking lot or somewhere immediately off reservation when it finally overwhelms the person, and VA laments that it cannot understand why....** When I recognize this **hostile projective identification** ploy by a staff member, consciously I control me from reacting in kind to an attack, disarming the situation. Then report s/he to executive offices and clinic director. Patient Advocate sweeps these matters under the carpet and those at the top never know about problems at the lower levels hiding behind plausible deniability until scandal erupts. In one case, an inexperienced NP still hit the eject button without probable cause, dumping me elsewhere, **to hide her incompetence and neglect.** Escaping liability for a high-risk patient, she sought to do that from the very first visit. Ms. NP was leaving the clinic anyway so did not face follow-up complaint consequences for her actions. Someone from behind the scenes was coaching her same as Ms. PhD psychologist. I have seen this done to other Vet patients and have undergone it as well before understanding some of the agencies methods behind its madness. On the surface it appears the Veteran’s are at fault for why VA is losing Vet numbers; not what VA employees are doing to cause and encourage those losses! Same for Vet suicides on and off VA campuses! No one is asking or even looking at what that institution’s staff is doing, behind closed doors, causing and exacerbating those deaths! That was my reason for walking away over 40 years ago after discharge and swearing I would die before ever setting foot in that shit hole again after my tolerance for maltreatment and racial bias by those bureaucrats reached maximum limits. Not much about VA has changed since, just different facilities, faces, and politicians: SOS in a different plastic bucket. No shows are Veteran passive-aggressive protests against the lousy treatment we are receiving, same as current ongoing suicide epidemic expresses, except to a lesser degree.

Opponents of VA privatization claim that the plan will never work citing end of the earth dire consequences at mere mention of such blasphemy. How can they know that? It has never been globally attempted. However, privatization is very successful according to each Veteran that never sets foot in a VA facility and per all of us who self-privatize each day either partly or in toto out of that hell care and benefit system. Every Veteran I personally know, only goes in to VA clinics for service connected circumstances to maintain his or her disability status from another denial. The rest of their medical care, including medicines, come from private sector healthcare, oft times including service connected conditions because they mistrust VA incompetence to not cripple them more!!

The most damning fact that privatized Veteran healthcare works is over 90% of all US Veterans do not use VA at all, per a Rand Report. VA ‘cooked’ numbers are that over 70% do not use VA at all. Independent polls, unskewed by VA bias, from a cross section of all US Veterans who responded conclusively returned that over 88% of them want private healthcare and true choice for care outside of VA. In other words, a majority of military veterans want private care, do not use VA at all; and those who do only use a small part of it notwithstanding the captive ‘prison inmates’ who cannot get healthcare anywhere else. 100 of these captives commit suicide every day ending their pain and protesting against injustice of a national shame. Only the deaf, dumb, blind, and stupid refuse to see this at least vaguely.

I say dump the politics to place human welfare first; privatize what is left of a failed empire and let us see what happens in real life practical application. The only end of anything that I see is to the shabby sham of ‘Veteran care’ we currently receive from a government HMO and to the non-Vet political parasites bleeding it dry. The failed agency in toto is embodiment of misery mixing politics and human well-being: an apocalypse of biblical proportions.

Nothing has changed in over 40 years since first contact with VA after discharge. VA and transition benefits were a complete fraud. I was salvageable then. When applying for C&P and service related help, VA betrayed me, lied and denied them in toto, and then misogynistically blamed my mother for service related problems! Moreover, the arrogant adjudication officer was bold enough to put that in writing, and I still have the rejection letter proving it. I never forgave the company for either sin especially about blaming my mother.

The most enigmatic aspect of this whole diatribe is when coming to VA for care, all the company had to do was provide adequate benefits and services per its boasts and claims without all the insanity and betrayals. How simple is that? If the agency had of done just that the reader would have never heard a peep out of me. However, instead of recruiting loyalty as an ally, VA alienated me otherwise.

I never understood what people are thinking when screwing over everyone else for percentages of the take, action, or loot. Surely, you realize – it is never enough! One forfeits everything making the final trip out of here in a

decorated box, covered with flowers, riding in the back of a black limousine, to spend eternity ENCHAINED to all that baggage in a graveyard. So one must ask the question: What is the point of living! What matters?

In closing, I did not use specific names of VA employees or locations involved; this is not personal or witch hunt; the cancer is epidemic across the whole VA culture. I pose a rhetorical question: what if a population were purposely fed mind altering, crazy-making substances via daily mass consumed items such as processed food, drinks, medicines, bottled water, vitamins, etc. that build up in a body over time to toxic levels. While constantly mentally terrorizing those consumers via mass media consumption creating hysteric, high-anxiety that generates an enmasse mental health and suicide epidemic and more. Psy-warfare weapon research for use in defeating enemy nations from within. VA does more 'research' using Veteran lab monkey's than it does anything else, except feeding their friends at the pork trough. Much like the undetectable HCV bio-warfare virus experiment used on US generations born between 1945–1965 to observe how it moved through society and medical ignorance. Just a simple thought to ponder...the lootership would not do that to us, would they?

DENIAL IS NOT ALLOWED

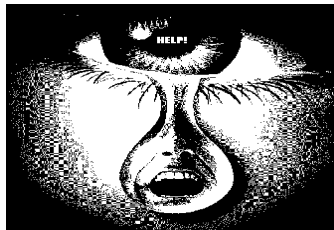

100 Active Duty military and ex-military Veterans SUICIDE every day in not getting the needed care from America or Veterans Affairs. How can 'We The Sheeple' hide from such atrocity? Military and Veteran SUICIDE is no joke!

*VA SUICIDE PREVENTION AND
TREATMENT PROGRAMS.*

WHEN REQUESTING

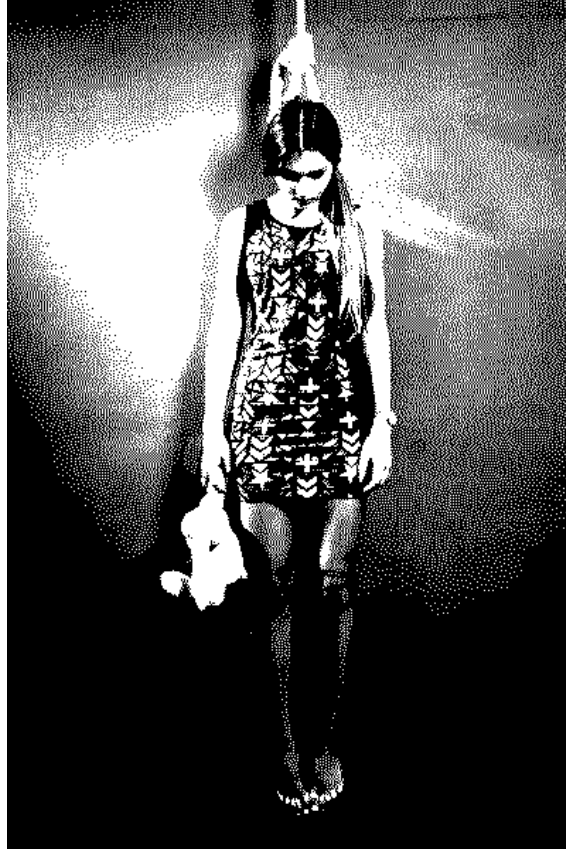

VA PRESCRIBED A ROPE.

VA's VET SUICIDE PROBLEM MAY BE RESOLVED

But not for her

*Veterans Administration and America refused to help;
so this Veteran died alone with only her teddy bear as comfort.*

USA is a national shame and disgrace. Not enough people are proactively 'taking action' and 'doing' what it takes to STOP active Military and Veteran suicide epidemic. Those who claim to do so actually promote and profit from what they claim to oppose. 100 veterans suicide every day from not getting needed care from America. Only a nation of profiteering slacktivists – VA, and its cronies could stoop this low profiteering from Veteran suffering and suicide.
